Import and export keychain items

You can export keychain items from one computer and then import them into Keychain Access on another.

▼ **Import keychain items**

1. Choose File > Import Items.

2. Navigate to the keychain items file you want to import and select it.

3. In the Destination Keychain pop-up menu, choose the keychain you want to import to, then click Open.

▼ **Export keychain items**

1. Select the items you want to export in the Keychain Access window.

2. Choose File > Export Items.

   If the Export Items menu is dimmed, then at least one of the selected items can't be exported.

3. Select a location to save your keychain items, click the File Format pop-up menu, then choose a file type.

4. Click Save.

5. Enter a password.

   The password is required to access the exported keychain items when you import them on another computer. Some exported items, such as public keys, don't require a password.
